

## Features

### CAN-Bus connectivity

- Electronic management of all components permitting quick and easy diagnosis
- All performance parameters can be configured exactly by the service technician for every individual mission

### Drive system

- Top speed 7.5km/h loaded and unloaded
- Automatic braking on releasing the travel switch
- Electromechanical braking initiated by the emergency stop button acts on the drive motor, proportion to the load carried
- Well controllable regenerative braking on reversing direction of travel

## Standard and Optional Equipment

### Standard Equipment

- Battery discharge indicator
- Suspension platform with skidproof mat
- Workstation incorporating storage compartments
- Fork 560/1150
- Power-assisted steering, adjustable steering resistance
- Automatic speed reduction on cornering
- AC drive motor
- Automatic braking on releasing butterfly switch
- Two fixed castor wheels
- Cushion drive wheel
- Tandem polyurethane load wheels
- Electric horn
- Low temperature protection to -10°C
- Electromagnetic emergency brake

### Optional Equipment

- Side battery change
- Fork 680/1150
- Polyurethane drive wheel
- Cold store version to -35°C
- Multifunctional display

### Safety

Three-way braking systems: automatic braking by LBC on releasing travel control switch; electromechanical braking when tiller is moved fully up or down; electronic braking by reversing travel control switch. Emergency stop button interrupts all electric circuits and actuates electromechanical brake. Round truck contours, no sharp edges, and all wheels contained within chassis, do not turn beyond truck contours. Hands protected within tiller head guard.

### Performance

The 1.5kW AC motor guarantees reaction on start-up and a high top speed, almost identical whether unloaded or loaded. The developed power is operated by LAC and is perfectly controlled.

### Comfort

Precision working at the highest level of performance calls for a high level of operator comfort. The platform is fitted with a flexible anti-vibration mat which dampens impacts. When

combined with electric steering, this new platform provides incomparable operating and handling comfort.

### Reliability

Tandem load wheels provide excellent reliable especially on the uneven ground. Each fork tip endures a load of 2,000kg without bending. Smooth entry of the fork into closed pallets is assisted by the ramped tip shape, lead-in and narrow width (165mm). Features that contribute to considerably longer truck lifetime as well as fast, easy and safe load handling.

### Service

Speed and economy continue over into truck diagnosis and preventive maintenance. CAN-Bus connectivity enables all truck data to be read out on laptop computer by the service technician. Swift access to all components and maintenance-free AC motors play an additional part in keeping truck uptime up.

## Features

### Linde control handlebars

- Ergonomic design and position
- Optimum protection for both hands
- All main control functions integrated in one handle for operation by either hand or both

### Power steering

- Proportional power assisted steering, effortless to operate
- Automatic speed reduction when cornering
- Adjustable steering feedback resulting in outstanding stability

### Battery and charger

- Vertical battery change
- Wide range of batteries (low & high) from 180Ah (2PzS) to 620Ah (4PzS)
- Wide range of standard and HF charger

### Workstation

- Battery discharge indicator
- Wide and deep storage compartments for wrapping paper, work gloves, writing utensils, etc.
- Soft mat platform for high operator comfort. Platform suspension with safety switch absorbs vibration and shock

### AC motor

- Powerful, smooth-running 1.5kW (at 100% performance) AC motor
- Moisture and dust-proof motor, maintenance-free
- Gradeability 13% fully loaded
- No rollback on uphill starting
